

Mark S. Smolinski, MD, MPH

Mark S. Smolinski, M.D., M.P.H. is in charge of predicting and preventing disease and drought as part of the global public health team at Google.org. He is a CDC-trained epidemiologist who worked previously as a vice president at the Nuclear Threat Initiative, where he worked on a regional disease surveillance system. He was a member of the investigation team during the Hantavirus discovery in the South-western United States. Prior to joining NTI, Mark was Senior Program Officer at the Institute of Medicine of the National Academy of Sciences and Study Director for *Microbial Threats to Health: Emergence, Detection, and Response*.

Mark received his medical degree from the University of Michigan, training in Internal Medicine at Oakwood Hospital in Dearborn, Michigan, and training in Preventive Medicine at the University of Arizona where he received his Masters in Public Health. He was a member of the investigation team during the hantavirus discovery in Southwestern United States in 1993. Mark was stationed as a CDC Epidemic Intelligence Officer in San Diego, California from 1995-1997, where his experience included epidemiologic field work in the Republic of Georgia. From 1997-2000, Mark was the ATPM Luther Terry Fellow at the U.S. Department of Health and Human Services in the Office of Public Health and Science where he was a member of the Healthy People 2010 development team and had primary responsibility for *Healthy People 2010: Understanding and Improving Health* that focuses on the Leading Health Indicators and a community health framework.
